

Technical drawing of a rectangular plate with the following dimensions and features:

- Overall width: 290
- Overall height: 850
- Four holes (represented by circles with an 'X') are located at the corners.
- Distance from the left edge to the center of the top-left hole: 125
- Distance between the centers of the top-left and top-right holes: 240
- Distance from the bottom edge to the center of the bottom-left hole: 50
- Distance between the centers of the bottom-left and bottom-right holes: 220

A schematic diagram of a four-terminal network. It consists of a central rectangular block with four terminals. On the left side, there are two input terminals, each with a small circle (representing a capacitor or inductor) connected to the main block. On the right side, there are two output terminals, each with a small circle connected to the main block. The terminals are arranged in a 2x2 grid.

Technical drawing of the 'Klimakomfort' unit. The front view (left) shows a rectangular unit with a width of 490 mm and a height of 1190 mm. The bottom section has a height of 50 mm and a width of 220 mm, featuring two circular ports with arrows indicating air flow (one up, one down). The side view (right) shows the unit's profile with a brick-patterned insulation layer. The top section is labeled (59-83) and the bottom section is labeled (27-51). The side view also shows two horizontal mounting brackets.
